# endicate®

**Electronic Temperature Monitoring Solution**

**Endicate® is an extremely accurate and user friendly temperature monitoring solution that meets WHO performance quality and safety requirements for international vaccine shipment monitoring.**

Highly regulated shipments present a challenge throughout shipping and storage. To guarantee the integrity of your product, ATI's Endicate electronic temperature monitoring solution provides reliable information about temperature excursions upon receipt of shipment. Endicate provides the assurance you need to guarantee a product's quality with a temperature range from -20°C to 70°C and 4 easily programmable alarms. Endicate can be can be customized with your branding and configured based on your tracking needs.

## UTILIZING ENDICATE

Endicate is easily deployed with the push of a button. The large display screen shows shipment status and gives a clear, readable notification detailing whether the shipment is okay or if a temperature excursion has been reached. This functionality gives you and your customer the confidence necessary to make an immediate decision in order to protect your brand and your consumer.

Not to be submerged in water
*Storage at 70°C will guarantee full shelf life*

## SPECIFICATIONS

| | |
|---|---|
| **Temperature Measurement Range** | -20°C to 70°C |
| **Temperature Accuracy** | ±0.5°C for full range |
| **Operating Life** | 60 days |
| **Start Options** | Button press |
| **Alarm Settings** | Up to 4 programmable time and temperature Single, continuous and cumulative available |
| **Sample Intervals** | 1-255 in increments of 1 minute |
| **Shelf Life** | 2 years* |
| **Delay Available** | 8 hours in 1 minute increments |
| **Application** | Adhesive backed |
| **Configuration** | Custom configuration and delay start |
| **Availability** | Single-use |
| **Time and Temperature** | Provides date and time each alarm was triggered |

Endicate's advanced time and temperature functionality allows you to pinpoint exactly when a product has been exposed to a temperature that may have affected its quality. Upon receipt of a shipment, the device displays a sequenced 6-digit code for each alarm. This code can be used to determine the exact date and time of each of the 4 alarms, protecting your brand and allowing you to assume responsibility throughout your supply chain.

**Have the confidence you need in your supply chain to ensure your product travels safely and your brand is protected.**
